

Let's keep them safe.

LOOK, CHECK, ASK A VET

PREVENTION

- **NEW ARRIVALS**
- Are they healthy?
- Are they recorded?
- What vaccines have they received?
- **QUARANTINE**
- Isolate for 10 to 14 days.
- Take daily rectal temperatures.
- Handle new horses last and use separate equipment.
- **HYGIENE**
- Clean and disinfect vehicles, gear and stables.
- Control insects and vermin.
- One horse, one syringe, one needle!!
- Maintain property security and train staff in disease response.

ACTION

- **ISOLATE**
- Notify a vet immediately.
- Isolate sick and in-contact horses.
- Take twice daily rectal temperatures.
- **HYGIENE**
- Handle sick horses last or use separate staff.
- **Wash hands** between every horse.
- Use separate equipment for sick horses.
- **QUARANTINE**
- Refuse entry of new horses unless they can be kept isolated.
- Do not send horses to ANY events or other premises until the all-clear is given.

COMMON SENSE = HEALTHY HORSES
